Professional Summary

Java Full Stack Developer with experience in Spring Boot, React.js, and REST APIs. Completed backend internship and built AI-integrated applications including chatbot systems and recommendation features.

Technical Skills

- **Languages:** Java, Python, JavaScript, HTML, CSS
- **Frameworks & Libraries:** Spring Boot, Hibernate, JPA, React.js, Bootstrap
- **Core Java:** OOP, Collections, Exception Handling, Multithreading, File Handling
- **Databases:** MySQL, PostgreSQL
- **Developer Tools:** Git, GitLab, Postman, Maven, Docker, IntelliJ IDEA, VS Code
- **Networking Fundamentals:** TCP/IP, UDP, HTTP/HTTPS
- **Core Concepts:** Object-Oriented Programming, Data Structures & Algorithms, REST APIs, JWT Authentication, Agile/Scrum
- **Operating Systems:** Linux (Basic), Windows
- **AI/ML Exposure:** Generative AI, RAG Chatbots, LLM Integration, Vector Search

Experience

Java Backend Developer Intern

Mar 2025 – May 2025

EvantageSoft, On-site

- Developed and maintained RESTful APIs using Java, Servlets/JSP, and MySQL for backend application features.
- Collaborated with senior developers to improve backend performance and enhance API responsiveness.
- Participated in Agile ceremonies including sprint planning, task discussions, and daily stand-ups.
- Performed API testing and documentation using Postman to support development and debugging workflows.

Projects

AI Volunteer Connect — Spring Boot, React.js, MySQL, JWT, LLM Integration

- Developed a full-stack volunteer management platform connecting NGOs and volunteers through a centralized web application.
- Implemented authentication, role-based workflows, and volunteer coordination features using Spring Boot and React.js.
- Integrated AI-based recommendation and chatbot support using LLM and RAG concepts to improve user assistance and interaction.

University Personal Chatbot — Spring Boot, React.js, MySQL, ChromaDB

Aug 2025

- Developed an AI chatbot to assist with academic and administrative queries in a university-focused use case.
- Used vector-based search concepts with ChromaDB to improve the relevance of chatbot responses.
- Built full-stack modules to support query handling, data access, and user interaction through a web interface.

Education

Bachelor of Science in Computer Science

2022 – Dec 2025

University of Sindh, Jamshoro, Sindh

Certifications & Academic Work

- **Data Science Research Project:** Conducted correlation analysis of screen time and eye strain using Python.
- **Java Full Stack Learning Path:** Completed hands-on learning and project work with Spring Boot, React, REST APIs, and MySQL.

Core Strengths

- Java Full Stack Development
- Backend API Development
- Problem Solving and Clean Code Practices
- AI Chatbot and RAG-based Application Development
- Team Collaboration in Agile Environments
